

2018 IECC Residential and Commercial - Building Energy Code Training

Hosted in Hawai'i Energy's training room at 45 N. King St., Suite 500, Honolulu, HI

1.5 AIA CEUs available

See registration links for training and webinar below

Residential in-person & online registration

Tuesday, May 13, 2025

11:30 AM - 1 PM

- Identify applicable requirements in the 2018 IECC
- Determine applicability and requirements of the Tropical-Zone energy code compliance option
- Determine compliance with the prescriptive requirements for building envelope and systems
- Use energy code checklists to review designs for compliance

Commercial in-person & online registration

Tuesday, May 20, 2025

11:30 AM - 1 PM

- Identify applicable requirements in the 2018 IECC
- Choose an appropriate compliance path
- Determine compliance with the prescriptive building envelope, lighting, and HVAC requirements
- Use energy code checklists to review designs for compliance

The state and counties continue to follow the 2018 International Energy Conservation Code with amendments. Join these two training sessions to refresh your energy code knowledge. The first session will cover low-rise residential requirements including town homes and three-story multifamily buildings. The second session will cover commercial and high-rise residential requirements.

Training conducted by Consultant Erik Kolderup for the Hawai'i State Energy Office
