

# EV Charging Guide

## What are the Different Levels of Charging?

### Level 1 (Home).

- 120V outlet charger provided with EV
- Slowest charger to charge up to 100%
- Ideal for roundtrip commutes under 40 miles

**4 Miles Per Hour**

### Level 2 (Home/public).

- 240V outlet charger sold separately for EV
- Most public stations are level 2
- Faster charger for BEV & PHEV vehicles

**25 Miles Per Hour**

### Level 3 (Public Only).

- DCFC or DCF fast chargers
- Quickest way to charge vehicle
- Best to use if battery state is below 80%

**200 Miles in 1-2 Hours**
