

# HOME ENERGY TIPS + TRICKS

## GARAGE

The road to 100% clean energy also means driving change in our transportation habits.

**ELECTRIC VEHICLES TODAY COME IN ALL SHAPES AND SIZES.**

With tax credits, reserved parking, free charging stations, and increased battery range, electrical vehicles are a smart and increasingly affordable clean transportation option.

## DID YOU KNOW?

Owning the most popular electric vehicle (Nissan Leaf) costs less than owning the most popular gasoline passenger vehicle (Toyota Camry).

## IT'S ELECTRIC!

Compared to gasoline fueled vehicles, electric cars are more energy efficient, can be powered by locally produced renewable electricity, and reduce greenhouse gas emissions.

Although you'll use energy to charge your electric vehicle,

**YOU CAN OFFSET THAT EXTRA CONSUMPTION**

by taking advantage of rebate programs from Hawai'i Energy and combining our tips and tricks, such as:

**UPGRADING**  
to a solar hot water heater

**TRADING UP**  
to an ENERGY STAR®  
refrigerator

**SWAPPING OUT**  
incandescent light bulbs  
for LEDs.
