

HOME ENERGY TIPS + TRICKS

LAUNDRY ROOM

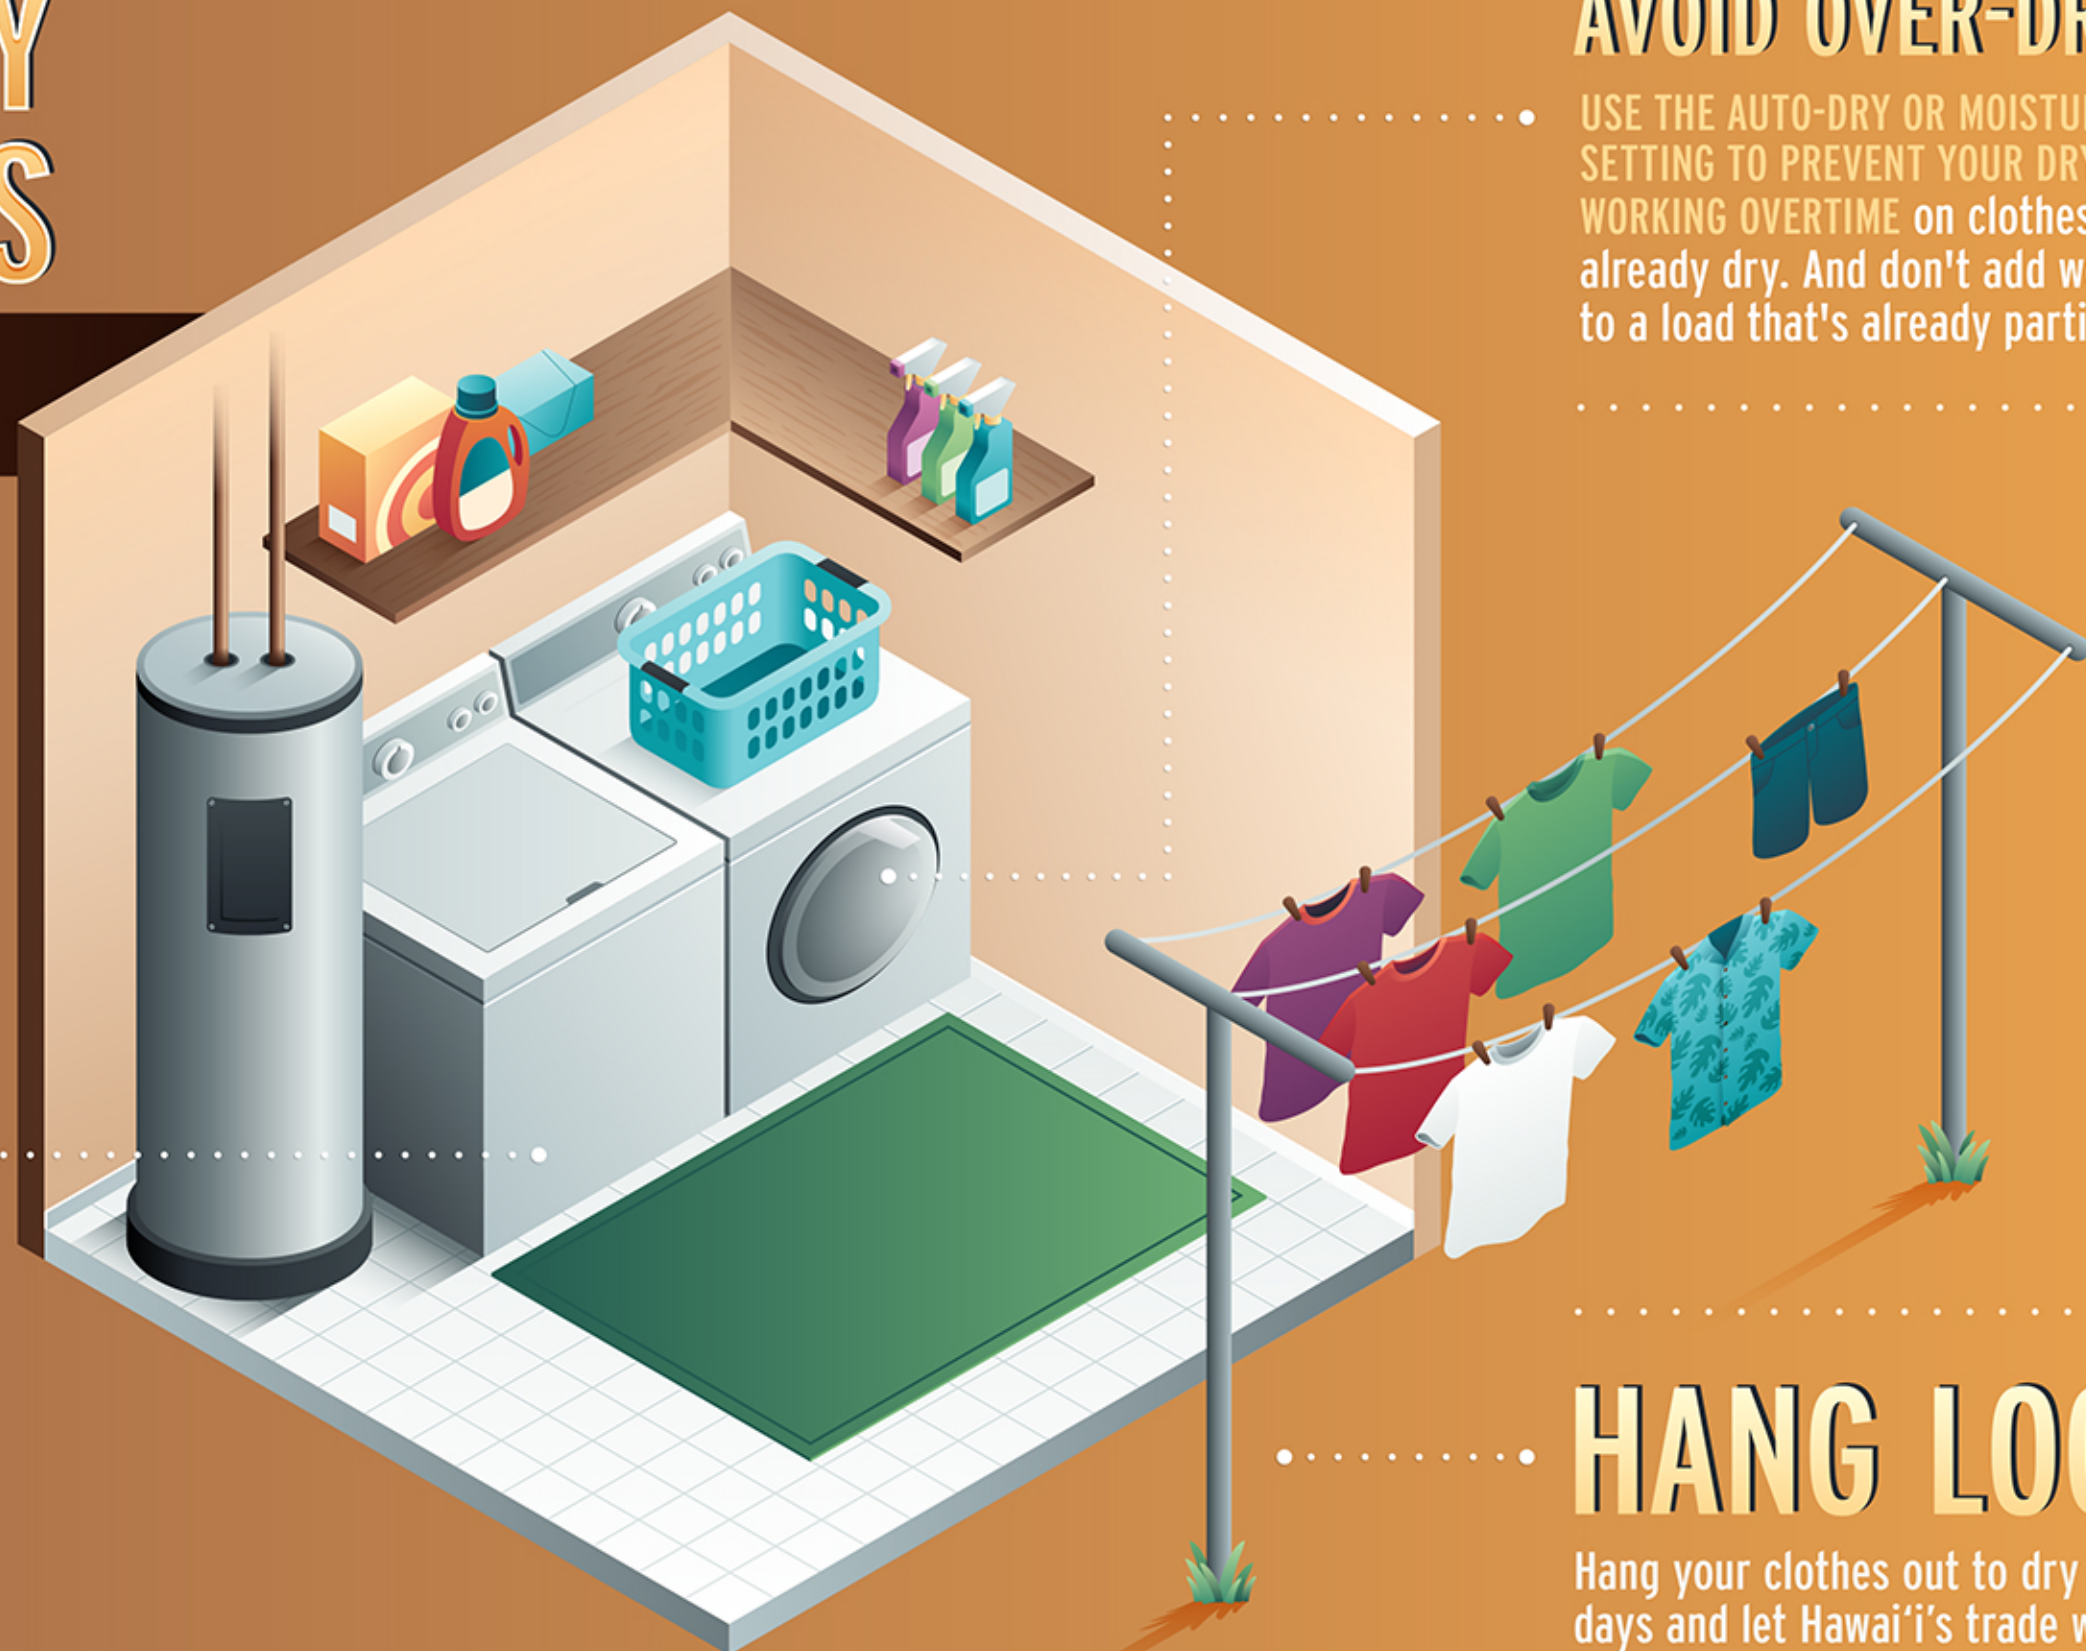

FRESH, CLEAN CLOTHES DON'T HAVE TO EQUAL BIG MONTHLY BILLS.

Wash out your old laundry habits and replace them with new ones that use less energy and can save you money.

WASH ON COLD

HEATING WATER ACCOUNTS FOR ABOUT 90% OF THE ENERGY NEEDED TO RUN A WASHER.

But today's washing machines and detergents are much better at lifting dirt at colder temperatures. Cold-water washing also keeps colors bright, reduces wrinkling, and won't set stains.

AVOID OVER-DRYING

USE THE AUTO-DRY OR MOISTURE-SENSOR SETTING TO PREVENT YOUR DRYER FROM WORKING OVERTIME on clothes that are already dry. And don't add wet items to a load that's already partially dry.

HANG LOOSE

Hang your clothes out to dry on sunny days and let Hawai'i's trade winds do the drying.
